## MEI Technologies, Inc. (MEIT)

**MEIT** is a Small Business headquartered in Houston, TX. We have been providing engineering, professional and management services to government customers in support of vital mission requirements since 1992. The experience we have gained in the past 25 years has enabled us to develop a mature level of management and exceptional contract performance. MEIT provides our customers with fully integrated, end-to-end management of the system life cycle, from the earliest mission planning and concept definition, through development, test and evaluation, to fielding and eventual recovery and refurbishment. We also provide a full complement of engineering, integration and test services for airborne, space-borne and ground-based systems.

### **CLIENT BASE:**

- United States Air Force
  - Life Cycle Management Center
  - Space and Missile Systems Center
  - Air Force Research Laboratory
- National Aeronautics and Space Administration
- United States Army
  - Space and Missile Defense Command
  - Army Missile Research, Development and Engineering Center

TRAC Labs was established in 1997 as a division of Metrica and is now an affiliate of Metrica.

TRAC Labs is also Metrica's partner in the OASIS SB Pool 4 contract and conducts world-class artificial intelligence and robotics research.

## AWARDS

TRAC Labs is the recipient of 48 Phase I and 25 Phase II SBIRs since 2007.

## Metrica, Inc.

### ABOUT US

Metrica is a woman-owned small business established in 1984 as a professional services firm. Metrica was a successful member of the Government's 8(a) program, graduating in 1995. Metrica is headquartered in San Antonio, Texas, and has domestic branch offices in Houston, Texas; Arlington, Virginia; and Princeton, New Jersey. Metrica's Professional Consulting Division has a unique and extensive history in research areas such as economic and behavioral modeling, neural networks, job performance measurement, and training evaluation and validation, to mention a few.

Metrica also provides a full spectrum of information technology (IT) infrastructure support, including IT support services, program management, and IT staffing, both CONUS and OCONUS. Metrica is the lead member of a joint venture for the GSA Alliant Small Business GWAC, Metrica Team Venture, and serves as the administrative lead on every contract.

providing concise and accurate ...  
information ... and continuing to  
meet all the contract objectives.  
Great job." (Army National Guard)

# MicroSystems Automation Group

### ABOUT US

For 29 years MSAG, a Service-Disabled, Veteran-Owned Small Business (SDVOSB), has been delivering a customer experience rated by Dun and Bradstreet as "top-tier" among government contractors (three most recent Open Ratings of 97 and above).

MSAG delivers positive customer experiences performing services that include business analysis and requirements definition; program and project management; software and database design and engineering; software development, testing and maintenance; and training.

We focus on operational efficiency and maintenance of robust processes to reduce program risk, achieve desired results, and avoid recurrence of defective services, with a corporate-wide emphasis on quality control and management. We follow ITIL practices for IT service management, and PMI's Project Management Body of Knowledge (PMBok).

MTSI is an 100% employee-owned engineering services and technology solutions company delivering first-choice capabilities to solve problems of global importance. Our mission is to make important, lasting contributions to the nation's defense, security, and most technically challenging strategic problems. Founded in 1993 by two retired Air Force engineers, we have achieved stable growth and have been recognized for our core values and commitment to our customers' success.

MTSI is a small business that has grown to over 800 employees with seven strategically located offices and additional client sites across the country. More than 95 percent of the MTSI technical staff has advanced degrees predominantly in engineering, physics, mathematics, and operations research. Most employees (>98%) hold at least a secret security clearance; of these, 78 percent hold a Top Secret (TS) clearance with 37 percent holding TS/Sensitive Compartmented Information (SCI). MTSI serves a diverse customer base that includes multiple government agencies and offices as well as numerous industry clients.

NikSoft Systems Corporation (NikSoft) is a small business providing IT and cybersecurity services to the Federal government since 1998. The NikSoft mission is to help the U.S. government secure our homeland, provide better citizen services and keep the U.S. military at the technological leading edge by providing world class services. Some examples include:

We helped the Defense Health Agency migrate 16 major applications that support the health of military personnel and their families to a cloud environment and are laying the groundwork for transition to microservices.

For the US Postal Service, NikSoft provides full cybersecurity support, including governance, cybersecurity engineering, threat intelligence, threat detection, incident management, and risk management.

At Customs and Border Protection we are transitioning existing legacy applications to a collection of cargo applications to consolidate infrastructure requirements, reduce operations and maintenance costs, and broaden the resource base to handle new system development and sustainment of transitioned applications.

**Odyssey Systems Consulting Group, Ltd** is a leading provider of management, analytical and technical support services for the government and the private sector. Established in 1997, Odyssey has since built a long-standing reputation for delivering innovative solutions in response to complex and challenging requirements.

Our portfolio of successful projects demonstrates our ability to efficiently plan, staff, and manage efforts of all scopes and sizes. Our employees support senior leaders by providing tailored functional expertise in technology, engineering, and management principles. We offer vast experience in acquisition strategy development and document generation; source selection support; cost, schedule, and performance management; systems engineering and analysis; risk management; cost/benefit and earned value analysis; computer-based training development; communication planning and operations; and lifecycle sustainment and product support.

## MISSION STATEMENT

Maximize customer satisfaction, employee potential, and continual improvement to become a recognized leader in the government services marketplace.

## CLIENTS

Odyssey provides Systems Engineering and Technical Assistance (SETA) and Assistance and Advisory (A&AS) services to a wide range of clients, including:

- U.S. Army
- U.S. Navy
- U.S. Air Force
- U.S. Coast Guard
- U.S. Department of Homeland Security
- Joint Improvised-Threat Detection Agency
- U.S. Missile Defense Agency
- Department of Energy – National Laboratories

## CORE COMPETENCIES

- Acquisition and Program Management
- Systems & Specialty Engineering
- Cybersecurity
- Operations & Sustainment
- Testing
- Training
- Exercises – Experiments – Wargames
- Research & Development
- Foreign Military Sales

Prime of the Year

# ABOUT US

Peerless Technologies Corporation carries on the long tradition of excellence in service associated with the name "Peerless" in Dayton, Ohio for nearly a century. On October 1, 2000, Peerless became the first company to move into The Entrepreneurs Center (TEC) and Edison Technology Incubator sponsored by the State of Ohio. Five years later, Peerless also became the first company to formally graduate from TEC. Peerless then constructed and occupied its corporate headquarters facility in Fairborn, Ohio, adjacent to Wright-Patterson Air Force Base. As we grew and emphasized a commitment to deliver and exceed expectations, Peerless quickly began adding clients and staff in both the commercial and Government sectors. We offer proven infrastructure and hands-on experience to execute and staff support requirements and provide responsive solutions. Peerless' prime contracts and contract vehicles support missions quickly and seamlessly, providing clients nationwide with solutions to challenging national security issues. Peerless aims to continue our support by solving these challenges for the new generation.

## RM ADVISORY SERVICES LLC

INTERNAL CONTROLS • AUDIT • GOVERNMENT SOLUTIONS

**ABOUT US:** RM Advisory Services LLC (RMAS) is a licensed CPA firm providing audit, financial management, accounting operations, audit readiness and advisory services to the Federal government. The firm is a distinctive solutions-driven firm bringing expertise in transformation, reliability, accuracy and sustainability to Federal financial operations. The company also provides audit and internal control assessment services to government contractors. Many of our professionals worked previously for Big Four audit firms and have advanced degrees in business, government management and auditing (CPA, MBA, CDFM, CGFM, CIA PMP, CISA). RMAS has undergone the AICPA peer review program to perform GAGAS Yellow Book audits, and received a PASS rating with no deficiencies. In 2017, Virginia Chamber of Commerce ranked RMAS as the 11th fastest growing company in Virginia. Since its establishment in 2005, the firm has succeeded by providing high quality audit, audit readiness and financial management services to large Federal agencies. The firm has a DoD facility clearance and ability to provide staff with personal security clearances at TS and Secret level.

**ABOUT US:** Sawdey Solution Services, Inc. is based in Dayton, Ohio since 2001, we are a Woman Owned/Service-Disabled Veteran Owned Small Business; certified by the SBA as a Small Disadvantaged Business. We are an ISO 9001 certified professional services company providing innovative strategic and technical planning, engineering, information technology, acquisition, integration, cyber security, financial management, logistics, and program management...far-exceeding customer expectations.

Our first priority is to provide value-added services to our customers. It is our intent to be more than a contractor - our consultants complement the customer's team as your partner. We work side by side with our customers, we assimilate your culture and become an integral part of your success. We mentor our customer's staff, transfer valuable professional management skills, cultivate new ideas, and apply industry best practices. We implement process measures to provide early warning signs that an effort is not producing desired results, and we help the customer take the necessary steps to mitigate those risks.

## The SURVICE Engineering Company, LLC

## ABOUT US:

SURVICE is a family-owned small business (under NAICS 541715) that has provided the Department of Defense (DoD) and other customers with high-quality analytical products and services for more than 35 years. The company was founded to perform specialized survivability/vulnerability analyses; however, we have continued to expand and enhance our capabilities to support a wide range of industries.

## CONTRACT INFORMATION:

- OASIS SB Pool 4 - GS00Q14OADS437
- OASIS SB Pool 5A - GS00Q14OADS519
- OASIS SB Pool 6 - GS00Q14OADS734

## CORE CAPABILITIES:

**SYSTEMS ANALYSIS & ENGINEERING** We have been a leader in analyzing the composition and performance of U.S. and foreign air, land, and sea combat systems. We conduct a wide variety of ballistic and nonballistic analyses and systems engineering studies, including analyzing threat-target interactions; susceptibility and vulnerability reduction; platform suitability; component, system, and mission performance; technology optimization; personnel vulnerability; fire prediction and mitigation; cyber survivability; E3; and lightning.

**TEST & EVALUATION** Our T&E professionals are involved in all aspects of acquisition program support, including ballistic and nonballistic (to include Directed Energy and Cyber threats) developmental, operational, and Live Fire testing. We perform test planning, management, conduct, analysis, and reporting; and utilize the latest automated data collection tools, damage assessment processes, and weapon system databases.

**MODELING & SIMULATION/ SOFTWARE ENGINEERING** We have proven expertise with the latest M&S and software engineering tools and technologies. We work with many engineering and physics-based component-, system-, and force-level models; and our capabilities span from algorithm/methodology development to code design and low-level optimization to configuration management and VV&A support. We also develop customized user interfaces and computational tools for various applications.

**DIMENSIONAL METROLOGY & REVERSE ENGINEERING** We are uniquely positioned to offer specialized, high-precision metrology (i.e., measurement), modeling, and related services. These services include reverse engineering, target exploitation, rapid prototyping, dimensional inspection, pre- and post-test damage assessment, 3-D geometric modeling, Technical Data Package (TDP) creation to address parts obsolescence; metrology integration support and metrology tool application and development.

**INFORMATION TECHNOLOGIES AND MANAGEMENT** We are a repository and distributor of the nation's vital defense-related information. We acquire, archive, analyze, synthesize, and disseminate scientific and technical information. We develop and maintain classified and unclassified databases, supporting the community practitioners in a wide range of research, development, test, and evaluation efforts.

# Contracting with T3W Using GSA OASIS SB

## WHAT IS THE GSA OASIS SB PROGRAM?

One Acquisition Solution for Integrated Services - Small Business (OASIS SB) is a family of multiple award, Indefinite Delivery, Indefinite Quantity (IDIQ) task order contracts for Government-wide professional services. OASIS SB contracts provide flexible and innovative solutions for complex professional services. The core disciplines of the contract include *program management, management consulting, logistics, engineering, scientific and financial services*.

GSA allows for flexibility for all contract types, including hybrids and cost-reimbursement, at the task order level; and allows for ancillary support components, commonly referred to as Other Direct Costs (ODC), at the task order level. T3W provides solutions for complex professional services through their span of expertise and mission spaces. T3W delivers integrated services and can deliver work that contains significant IT components.

## WHY USE GSA OASIS SB?

By choosing to work with T3W, customer agencies reap the benefits of GSA OASIS SB and T3W's expertise in multiple disciplines such as *program management, management consulting, logistics, engineering, scientific and financial services*. Working with T3W, through the use of OASIS SB gives businesses:

- Small Business credit and ability to reserve task orders for exclusive competition among SB categories including: 8(a), HUBZone, SDVOSB, Economically Disadvantaged Women-owned Small Business and Women-owned Small Business concerns eligible under the Women-owned SB Program
- Automated Price Tool: Quick and easy to use for building realistic estimates (e.g., IGCE)
- Long-Term Planning: OASIS SB has no program ceiling, a five-year base and one five-year option, and provides for long term planning for complex program requirements
- Standardized Labor Categories: OASIS SB offers meaningful proposed rate comparisons at the task order level
- Tiered Access Fee: Ranging from 0.1 percent to 0.75 percent based on obligation level
- Use of MIPR funds by using a DD Form 448

## HOW TO USE THE OASIS SB CONTRACTING VEHICLE?

*The following are steps on how to use OASIS SB to work with T3W:*

**STEP 1:** Request a Delegation of Procurement Authority (DPA) by emailing [OasisCustomerSupport@gsa.gov](mailto:OasisCustomerSupport@gsa.gov)

**STEP 2:** Once approved, attend DPA Training

**STEP 3:** Conduct Market Research and Acquisition Planning by using the GSA website as well as Requests for Information and Draft Task Order Solicitations

**STEP 4:** Build the Task Order Solicitation and update the Pricing Tool

**STEP 5:** Issue the Task Order Solicitation

**STEP 6:** Conduct Evaluations and award the Task Order

**\*Note: Steps 1 through 6 take approximately 10 to 14 working days to complete**

## AWARDS

## ABOUT US:

Torch Technologies is a 100-percent employee-owned small business with over 850 employees dedicated to quality technical services, competitive costs, and ethical business practices headquartered in Huntsville, Alabama, with employee-owners located in 14 other facilities located across CONUS US, Hawaii, and internationally.

In 2017, our annual revenues were approximately \$350 million, and we currently hold 40 relevant research and development prime contracts worth over \$2 billion.

Torch Technologies is dedicated to providing superior research, development, and engineering services to the Department of Defense in the following primary areas: Weapon System Performance Analysis – to include sensors/seekers, aerodynamics, guidance and control, target discrimination, endgame performance, and command and control; Modeling and Simulation – with emphasis primarily on high-fidelity level simulations including all digital simulations, Software-in-the-Loop (SWIL) and Hardware-in-the-Loop (HWIL) simulations; Information Technology such as distributed simulations/data management, visualization techniques, high performance computers, and network integration; Manned and Unmanned Aviation; Test & Evaluation (T&E); and Advanced Technology Research and Development including development, testing, and implementation of innovative algorithms and software.

Torch Technologies is ISO 9001:2015 certified, and our Aviation Division has achieved a CMMI Level 3 rating for Product and Service Development (CMMI-DEV).

USfalcon is a Service-Disabled Veteran-Owned Small Business (SDVOSB) and the Pool 6 prime contractor currently executing OASIS task orders across the Department of Defense. The largest task orders are in support of the Air Force at Wright-Patterson AFB, Ohio, Tinker AFB, Oklahoma and the Army at Joint Base Langley-Eustis, Virginia. USfalcon brings a wealth of experience and knowledge of aircraft maintenance and retrofit for both fixed and rotary wing aircraft. USfalcon is a worldwide provider of mission critical professional, engineering, and information technology services in support of our Government and business partner clients. These contracts use specialized personnel performing an array of highly classified, technically demanding efforts in the Security and Cyber Support arena. USfalcon has a robust security team with over 75% of our employees having security clearances, and 50% of the company with top secret clearances. The Defense Security Service (DSS) has rated USfalcon "Superior" in two recent security audits. USfalcon also provides mission systems engineering solutions that include system design and development, systems engineering, system integration, system administration, modeling and simulation, test and evaluation, exercise support, field service rep, and special projects; and cyber security, network operations, counter-intrusion support, penetration testing and network simulation, accreditation and certification, information technology modernization, virtualization, enterprise system development, software applications development, and help desk services.
